QUESTION AND ANSWERS

EHR – RPMS Server Replacement

PROJECT: QCV-TDS-09-028-001

Date: March 20, 2009

QUESTION AND ANSWERS

1. The system specifications include 8GB of RAM and the 32-bit Windows Server 2003 Standard Edition does not support 8GB of RAM. Do you want the 64-bit Windows Server 2003 Standard Edition?

   Answer: No, an amendment will be issued to address this requirement change, please see Amendment 1.

2. Is GSA approved hardware a requirement?

   Answer: No, an amendment will be issued to address this requirement change, please see Amendment 1 for updated requirement.

3. A Rack Bezel (requirement 4.1.17) was requested; however Rapid/Versa Rails was not included. Do you require rack rails?

   Answer: Yes, an amendment will be issued to address this requirement change, please see Amendment 1 for updated requirement.
